Forage harvester

FTN 1000 S

Sugarcane has been an important source of food for livestock and to meet this demand the engineering team of Nogueira continues to develop new technologies.

The innovative FTN 1000 S Forage Harvester arrives on the world market with a new and special cutting front in total area.

FTN 1000 S Forage Harvester is essential for harvesting sugarcane and tall grasses as its system allows precise cutting of the stalk, facilitating regrowth!

Technical Characteristics

Production	till 38 t/h
Cut sizes	12 (from 2,5 to 18 mm)
Number of rotor	1
Number of drums	2
Number of blades	14
Number of gathering drums	4
Power source	tractor PTO
Required power at PTO	from 85 to 125 hp
Required revolution at PTO	540 RPM
Transmission system	gearbox
Weight	1072 kg

Essential in the field

Rua Fernando de Souza, 533 - Distrito Industrial
São João da Boa Vista - SP - CEP 13877-755
Tel.: (19) 3813-9706 / Fax (19) 3813-9706
