

DPM

Desintegrator - Chopper - Grinder

DMP 1 - DPM 2 - DPM 4

The DPM line has modern and efficient machines, equipped with a powerful rotor with blades and hammers that grind, chop and crush a wide variety of products, such as corn on the cob and sorghum for flour production to produce concentrated feed for livestock.

Its specially designed blades are made of high-strength steel that quickly and accurately chops various types of forage such as sugar cane, maize, sorghum, and grass for the daily treatment of animals, as well as in the preparation of the silo.

It features an optional cyclone moofs that facilitates the filling of flour storage bags.

Option w/ cyclone

With trestle

Powerful high-resistant rotor

Option with tractor coupling
