

SERIE TN-8

REHYDRATOR GRAIN

TN-8 REHYDRATOR

Take control of your feed quality with the TN-8 Rehydrator, the cutting-edge solution for transforming dry maize into high-performance silage. By adding water evenly to milled grains, the TN-8 restores ideal moisture levels, creating perfect conditions for fermentation. The result? Better starch digestibility, which leads to greater meat and milk production.

With the TN-8 Rehydrator, you get:

- Uniform grain rehydration for ideal ensiling.
- Increased starch digestibility for better results in dairy and beef cattle.
- Flexibility to buy dry maize, regardless of harvest timing.
- Finer grinding for higher rumen energy absorption.
- Reduced losses and excellent cost-effectiveness.

The TN-8 is a smart, efficient way to turn dry maize into high-quality feed.

TN-8 Rehydrator - Production de Maize (KG/HR)			
SIEVES			
MAIZE IN GRAINS	0,8 mm	3,0 mm	5,0 mm
	450	-	2500

TECHNICAL FEATURES	TN-8 REHYDRATOR
Power of tractor	36 hp
Power Electrical Motor	N/A
Drive	Tractor
Rotation	3320 up to 3670 RPM
Number of rotor hammers	36
Weight	260 kg
Versions	Accessory for tractor without cyclone
